

**Name:** Nikunj Gupta

**Email:** [nikunjgupta102@gmail.com](mailto:nikunjgupta102@gmail.com)

**Mobile No:** 9910632027

### **Work Experience:**

1. **Developer at Razor Infotech** (2 years)(15<sup>th</sup> May 2023 – Currently Working)
  - Working as project manager for ERP/Employee Management Software called Human Maximizer(<https://humanmaximizer.com/>) to build a tool that can manage employee's punch in/punch out, leave management, task, management, issue management, Payroll Management, Job Vacancy Management for clients. Also developed its app.
  - Working on AI tool for BPO services for dynamic agent management and reducing the need of managers per 10 employees in BPO.
  - Developed websites for Razor Infotech <https://razorinfotech.com/> (developed front end using html, css javascript, created complicated job portal forms using php including resume being fetched on mail), Travkom <https://travkom.com/> (Developed front-end and used php in backend), Stone JD <https://stonejd.com/> (Developed front-end and used php in backend), La-Stoinolo Minings <https://la-stoniolominings.com/> (Developed front-end and used php in backend), Beetle Infratech <https://beetleinfratech.com/> (Created Admin Panel using Mysql and PHP)
  - Worked on a in house project <https://gadgetfobia.com/> using MERN stack, basically a project where user can see specifications of various products to compare before buying, developed various functionalities like fuzzy search, filter, compare using redux, builded various API's to fetch data, made complete front end dynamic, admin panel to add or delete products, login-signup, wishlist, adding comments)
  - Problems solved-
    1. The data was not present for gadgetfobia so built an automated data scraping bot using python used it ethically to fetch specifications of around 30,000 products for our website)
    2. Worked with SEO team to get 40% more traffic on websites like Gadgetfobia and Razor Infotech
  - Things Learnt-
    1. Working on various projects side by side
    2. Adapted technologies like python, using AI tools like AI DALL E etc, hosting backend on vps, AMAZON S3 for images, Tawk to integration and various other things

2. **Internship at Akaaro Consultancy** (2 Months)(3<sup>rd</sup> August 2020 to 2<sup>nd</sup> October 2020)
  - Learned and adapted various web technologies during the internship such as HTML, CSS, Bootstrap, learned responsive design by working on company's given tasks.
3. **Internship at Handlebuzz** (3 Months)(18<sup>th</sup> June 2023 to 30<sup>th</sup> April 2023)
  - Handlebuzz is a software company which made softwares for its foreign clients, so here I developed complete landing page for an Iraq company while attending meetings with my seniors and understanding the requirements of the client.
  - Skills adapted Business Requirement, Communication Skills, Presentation Skills, JavaScript, WordPress, Elementor, PHP, LARAVEL, FTP (server), GitHub.
  - Problems solved during the internship -
    - 1) Making the website responsive for an 85-inch screen

2) Converting the website into foreign (Arabic) language

**Website Link** - <https://zainal-iraq.com/> (The client have not renewed the hosting)

**GitHub Link** - <https://github.com/Handlebuzz/house-booking-homepage.git> (branch-development)

#### **Freelance Projects -**

1. Shehnaiplayers(International Shehnai band) <https://shehnaiplayer.com/> (Complete front end on react)
2. <https://roots.org.in/> (Currently working) (Personal Project of director of National School of Drama Delhi)
3. <https://pacreativestudio.in>

#### **Key Skills -**

- Programming Skills – Mongo DB(Expert), Node JS(Expert), Express JS(Expert), Next JS(Intermediate), React Native(Intermediate), React JS(Expert), HTML(Expert), CSS(expert), Bootstrap(Expert), JavaScript(Expert), WordPress, Elementor, PHP(Expert), Laravel(Basic), GitHub, AWS(S3), Python(Basic)
- Problem solving and Debugging
- Adapting New technologies during the projects
- Project Management and business requirements
- Completing tasks on time

#### **Live Personal Project Links and GitHub Links -**

- [GPT-3 \(react-moder-website-nikunj.netlify.app\)](https://react-moder-website-nikunj.netlify.app)
- [Cryptoverse \(crypto-app-nikunj.netlify.app\)](https://crypto-app-nikunj.netlify.app)
